

ECTechno

Professional standard Nozzle focused to Washing

Seriously concentrated to materialize the more effective and washing only, as well as can be fully used in the most hard condition, and selected the materials and designed together with water-stopping function.

Have materialized customers' desire to wash up in a shorter time with less volume of water, to splash far away as far as possible, and to minimize the load for waste water treatment, etc.

Now, you can be satisfied with our Bubbl'NSonic washing Nozzle made with our accumulated special effort to cope with your desires.

BUBBL'N SONIC Nozzle for washing

Nozzle with the special structure for water sprinkling can offer you more strong water-flow, from the spout even with weak water pressure. In addition, one-shot effective washing to the aimed spot, controlling spattering water volume even impact at high speed, by taking air into the water-flow, so that more than 50% water cost saving merit is for you, comparing with the conventional way of water hose !
The more convenient nozzle for washing, with water stopping function lever good in hard condition like food factories and construction fields, due to structure of no molded plastic part. By using our BUBBL'NSONIC friendly for everybody, you can join to contribute for environmental protection, just through water saving.

All body made with metal material

Tough body with no molded part

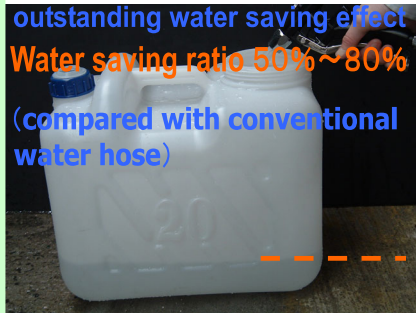

Very fine foamed air

Out-flowing water, taking in, less spattered but hydrophile jet water-flow

Appealing 4 characters

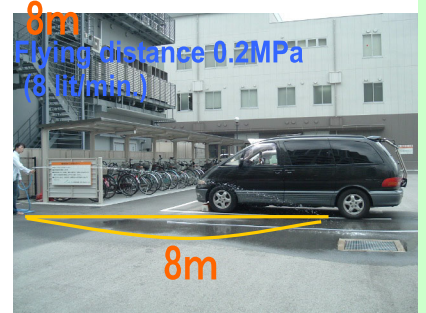

Higher washing power, with strong water-flow, outstanding water saving effect

Water saving ratio 50%~80% (compared with conventional water hose)

Miracle straight water-flow but less water volume

8m Flying distance=0.2MPa (8 lit/min)

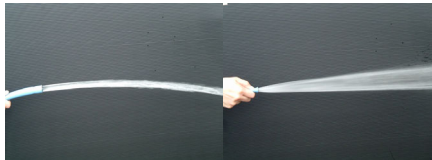

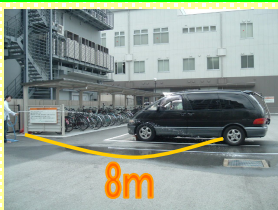

ECTechno are challenging to the Global warming protection activities through water & energy-saving promotion, and acting as the member of "Team Minus 6%".

Compare with Others

Our High Efficiency Washing Nozzle with Bubbling Effect

	Conventional (Other Makes)	Bubble Sonic Washing Nozzle
Water-stopping function	 <p>(normal hose) (end narrowed) To narrow the end for strengthening.</p>	 <p>Out-flowing/ stopping easy by lever. straight-forwarded water-flow by water-stopping function.</p>
Water saving effect	 <p>Fully supplied in 30sec. overflowed. In case of necessary volume of water.</p>	 <p>In the same 30 sec. typically less volume of water flowing into. With 1/5 water volume effective washing.</p>
Reaching distance	 <p>5~8m Spraying widely when narrowing the hose end.</p>	 <p>8m Less volume but strong flow reach far distance. With 1/5 water volume the same distance.</p>
Washing capability	 <p>Washing with more volume of water.</p>	 <p>Spot like mold washing away by high pressure washing water. Aimed spot can be quickly washed.</p>
Water splashed	 <p>(normal hose) (end narrowed) Many water splashed, ineffective washing.</p>	 <p>Due to hydrophile water is spread when impact. Less water splattered but effective washing.</p>

- By bubbling effect, higher washing power but less water splashed.
- More fine foam (air bubble) give higher hydrophile and scrape dirt out.
- Water saving more than 50%, stronger water-flow (comparing with hose use).
- No molded plastic part, all body made with metal material.
- Increased bubble volume by air, when detergent added.

<Recommended washing applications>

Machinery/Kitchen Apparatus/Automobile/Ship/Bathroom/Tile/Filter/Wheel/Earth&Sand, etc.

<Prohibited>

Don't use for flower bed • soft wall surface, etc.

Product name	Washing nozzle 「BUBBL'N SONIC」
Type	EB-N110
Application	Washing for floor • apparatus, etc.
Material	Grip: brass • aluminum • stainless steel Nozzle: brass • chromated finish Packing: rubber
Accessories	Stainless steel made hose band
Desired retail price	Open price
