

SHOWER HEAD with Water-Saving Effect

**Enjoy massage effect by air-bubble,
together with saving water result !
Let's have more happy shower time
with negative ion effect !**

• Characters •

Saving water **40 ~ 50 %** in volume

(depending on the original water pressure, etc)

Cleaning with bubble (better foaming)

Each foam creating negative ion power
for **Healing effect**

Our Products

2007
ECTechno, Inc.

ECTechno

What is ECTechno, Inc.?

< ECTechno, Inc. >

President & C.E.O. : Katsutoshi Morishita

Established : May, 1999 Paid-up capital : 3 million yen

Located : Higashi Osaka City, Osaka Pref. Creation Core Higashi Osaka Bldg., Organization for Small & Medium Enterprises and Regional Innovation, JAPAN

Management Idea (Company name < ECTechno > is derived from)

Energy resources available are limited on the earth, therefore, we must think the most effective way of the usages for them and, we must protect our environment and **C**onserve them through our study for development of the useful **T**echnology so that we can contribute for our customers and the local communities.

Main business

Designing of Water-Saving type tap water metal fittings, distribution of them, including OEM base business and Consulting business for water-saving (ECT Water-Saving System).

Characteristics (Saving water effectively)

Enjoy our saving water **40 ~ 50%** in volume
by replacing the conventional shower head only.

「Creating air bubbles, by inhaling of the water pressure」
by our simple structure for easy replacement.

Our Shower Head

Adapters available
when screw different

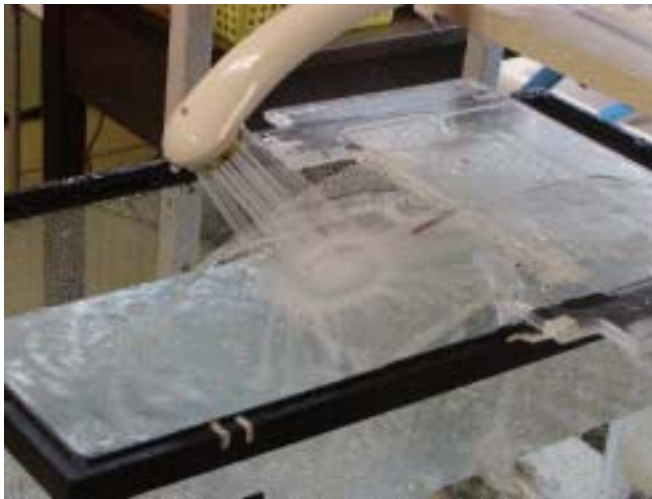

Compare with the conventional type,

- **40 ~ 50% in volume Saving Water** (variable by the water pressure, etc.)
- **Out-flowing water power 1.2 times UP** (vs. pinching type)
- **Massage effect with the fine air bubbles**
- **Negative ion effect**

Available characteristic as Shower (The more powerful water despite saving the volume)

Water pressure test testify that :

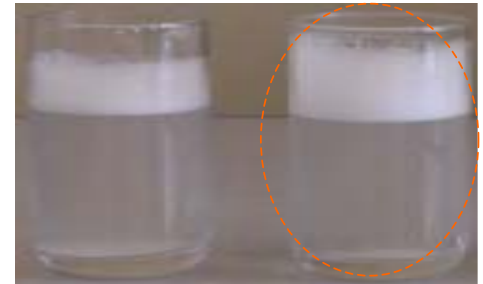

ECTechno's Shower Head gives you the stronger water-flow power, when compare with the same water volume.

No change for bodily sensation, despite of less water volume. In addition, the stronger water power 1.2 times available than by the pinching type conventional devices.

Available characteristic as Shower (Massage by air-bubbles, better foaming)

- As the shower with air-bubbles is so mild, customers cannot notice water-saving consciousness due to the volume of the bubbles.
- The better foaming even with the same volume of detergent (shampoo), resulting more economic due to less detergent volume.

The air-compressor, etc. are totally unnecessary for mixing the air bubbles.

Special structure by ECTechno, naturally inhaling the air with the portable water pressure only.

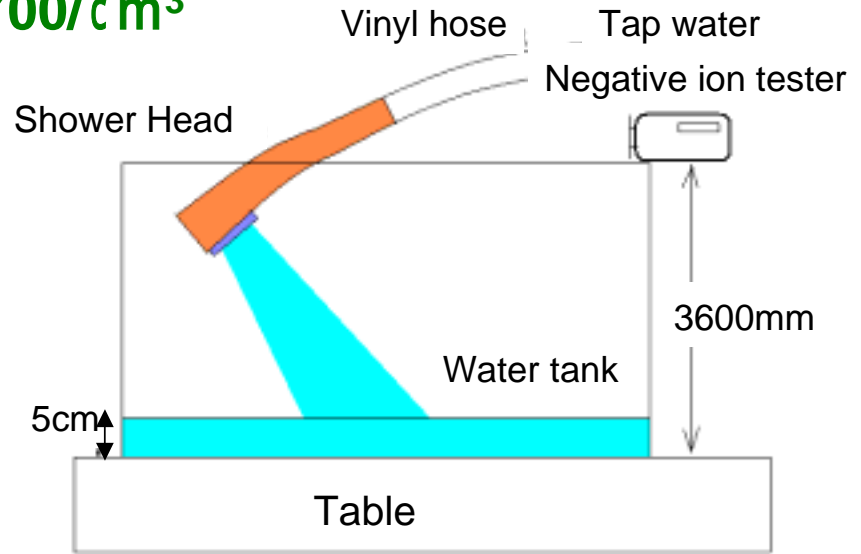

Available characteristic as Shower (Negative Ion)

Measured : **24,700/c m³**

< References >

Measured at near-by	Negative Ion
Water-fall	18,000
Water-fountain	8,000
Wooden house	2,100
Road with heavy traffics	500

Double volume of negative ion can be created, comparing with the conventional water discharge, the healing effect can be derived through our Shower Head.

Bubbl'n Sonic approved by :

- Higashi Osaka City, the famous city as special manufacturers area, have approved as Higashi Osaka Brand in quality.

Plus-One Product

The symbol mark, on the left, is the registered trade mark, and is derived from and stands for "HigashiOsaka", "Only 1", "No.1" and "Plus ".
